

ENVYLAWN™

Always Green with Envy

ENVYSHOCK™ | CREATING A SAFER WORLD TO PLAY

Safeguarding our children so they can run and play freely is why EnvyShock was created. We worry about that accidental fall but want our kids to have the care-free attitude that they deserve. With EnvyShock added under the synthetic grass on your playground, you can feel at ease that your children are safe. EnvyShock uses a thick foam underlayment reinforcement to cushion any potential fall. It also has antimicrobial resistant abilities which will help keep your children and families healthy. Protecting our children is our main priority. EnvyShock is Creating a Safer World to Play.

Key Benefits of EnvyShock™
